Track Chairs Available For Trails

AIMEE COPELAND FOUNDATION

ALL TERRAIN GEORGIA
Hard Labor Creek State Park

Hard Labor Creek State Park, located in Morgan and Walton counties, is one of the largest state parks in Georgia. The park’s unusual name is derived from a bold stream that cuts an easterly course through the state of Georgia and became known as Hard Labor terraces, constructed roads and cleared lakebeds. In the 1930s by the Civilian Conservation Corps and the Work Progress Administration. Beginning in 1934, these industrious workers planted thousands of trees, built dikes and terraces, constructed roads and cleared lakebeds. In 1946, the Recreation Demonstration Area was given to the State of Georgia and became known as Hard Labor Creek State Park.

Rules for Stable Use and Equestrian Trails:
- Present a negative equine infectious anemia test for each horse.
- Ride only during daylight, between dawn and sunset.
- Do not ride on roadways or any other area that is not clearly identified for equestrians.
- Do not ride in a fast or reckless manner.
- Attend horses at all times.
- Ride no more than 2 abreast on trails.
- Do not graze horses.
- Camp only in the designated campground.
- Do not ride horses into the campground.
- Do not picnic in the campground.
- Do not stable horses using a tie-line or temporary corral.
- Do not put more than one horse in each stall.
- Dogs must be leashed and attended at all times.
- Only registered overnight park visitors may stable horses.
- Return stall key(s) to the park office by 1 p.m. on the day of departure.
- Remove soiled bedding from stall(s) prior to departing.
- Do not consume alcoholic beverages in day-use areas.
- No smoking in the stable area.

MOUNTAIN BIKE TRAIL AREA

There are 16.5 miles of mountain bike trails appropriate for the beginner to advanced experience levels. The trail system is true single-track. Please note the direction of the day as you enter the trail. The Orange Loop is about 1 mile on level ground which takes the rider through an interesting area of regenerating pine forest. The Red Loop is a more challenging 5.15 mile loop that will take the rider up and down gently sloping terrain and crosses older hardwood forest of mixed pine and hardwood stands. Along the way are balm fern covered stream bottoms, boulder formations and cascading streams. This trail is rated for the Intermediate/Advanced riders. The Blue Loop is a 5 mile loop rated for the Beginner/Intermediate rider highlighting four creek-side excursions. The Green Loop has 5 miles of Beginner/Intermediate rated rolling single track. Hikers yield to bikers and hikers opposite the direction indicated on signage.

SAFETY TIPS
- Tell someone your itinerary and expected return time.
- Take a map, water, snacks, first aid kit, flashlight and whistle. Three short blasts on a whistle are known as a call for help.
- Do not stray from trails. If you become lost, stay in one location and wait for help. This will make it easier for rescuers to find you.
- Don’t count on cell phones to work in remote areas, but if they do, be able to give details about your location.
- Invest in good hiking socks such as those found at sporting good stores. Avoid blisters by carrying “moleskin” and applying it as soon as you feel hot spots on your feet.
- Be prepared for unexpected rain and wind which can lead to hypothermia. Always carry quality rain gear and turn back in bad weather. If you become wet or cold, it is important to get dry and warm as quickly as possible.
- Dress in layers and avoid cotton.

ETIQUETTE
- Pack out all trash.
- Keep dogs on a leash at all times.
- Do not pick flowers, disturb wildlife or take anything off the park.
- Protect the park and help prevent erosion by staying on the trails.
- Give the right-of-way to equestrians. Do not make loud noises or hurried movements around horses.

TICKS

These arthropods feed on warm-blooded animals. They do not fly or jump, they come in contact with us or our pets when we walk in tall grass or brush. It is possible to contract diseases such as Rocky Mountain Spotted Fever or Lyme Disease if an infected tick stays attached for a long period of time. Use insect repellent and always check yourself and your pet after each hike. Ticks should be removed with tweezers. Avoid crushing the tick. Nail polish, hot matches, or kerosene will NOT make a tick let go. If you develop a fever or rash within 2 to 3 weeks after a tick bite, see your physician.
