

## DISCOVER NATURAL WONDERS WITH US

Prepare for an environmental adventure in the field and in the classroom. Most discoveries are geared towards groups of 15 to 60 students in grades PreK - 6. Students must be within two grade levels of each other. **Note: Exciting programs for older students, adults, or family groups can be arranged. Contact us for details.**

**On-site basic program cost is \$5 per student & additional adults, min. of \$75. Group Archery is also offered at \$15 per student and includes all equipment, min of \$150.** Two teachers or chaperones are permitted FREE per 15 students unless there are noted Special Needs and additional adults will be allowed. Programs are scheduled on a first-come, first-served, space-available basis year-round. There is a Parking Fee of \$5 per personal vehicle unless you have an annual park pass. **To schedule a school visit** complete an online school program application form at [gastateparks.org/fdroosevelt](http://gastateparks.org/fdroosevelt) at least 8 weeks in advance of requested date and save it as a document & email it back. We will contact you with date and topic confirmation. Your request does not guarantee a confirmation.

## Sample School Visit Schedule

(45 students)

**9:30 a.m.** Arrival to group shelter, Restroom stop, Teacher & student orientation, Review schedule  
**10:00 a.m.** Divide group Outdoor discovery 1/2; Classroom/lab investigation 1/2  
**11:00 a.m.** Switch, Final Review

## 2018-2019 School Programs at F. D. Roosevelt State Park

 **GEORGIA**  
DEPARTMENT OF NATURAL RESOURCES  
**F. D. ROOSEVELT STATE PARK**

## WELCOME TO F. D. ROOSEVELT STATE PARK

Named for the 32nd President of the United States, its location of 9,049 acres in west-central Georgia provides diverse habitats for vast learning experiences. Pine Mountain Ridge (about 110 miles from Barnesville to just west of the Alabama line) runs through the park forming a unique physiogeographic region.

This park is deeply rooted in the historical era of four-time president Franklin D. Roosevelt. Seeking a place for treatment after he was stricken with polio in 1921, Roosevelt travelled to nearby Warm Springs and built his Little White House, now a State Historic Site. Several structures within the park were built by Roosevelt's Civilian Conservation Corps during the Depression, including the stone swimming pool, cottages, and the park office.

Here students become naturalists, scientists and historians for the day as they explore the park's trails, woodlands, lakes, and streams discovering natural and cultural wonders of the Piedmont region of Georgia. Self-guided discoveries are available, but still must be approved so that we can offer you a positive learning experience. Contact us for more details.

Most activities will be conducted outdoors along trails, by the lakes, and in the streams, where students, teachers and other adults will be actively engaged. Outside and supportive classroom/sheltered

lab investigations allow students to research, sort, compare, contrast, measure, examine, draw, and journal their findings. If there is inclement weather or special student needs, indoor explorations will become primary. Investigations are age-appropriate and discoveries vary with weather and time of year.

**On-Site Student Discovery Programs**  
with GA Performance Standards  
Offered for Grades Pre-K-6  
**Special, tailored Programs for  
grades 7-12 may also be requested.**  
be requested

**Pre K, K The Incredibles– The Animals**  
SKL1, SKL2

Learn what animals really do when you are not watching. Investigate small invertebrates and study habits and habitats of larger vertebrates.

**1<sup>st</sup> Fantastic Beasts and Bushes**  
S1L1

Set out on an adventure to uncover and investigate local plants and animals and get a close-up look at plant parts and what they do.
